OVERVIEW

Screen Machine Industries is a global leader in crushing and screening equipment with manufacturing headquarters located in Columbus, Ohio, USA.

Directionally reversible, 42” wide conveyor with impact bed and guide idlers creates maintenance free material flows

Caterpillar® C-9 300 HP Tier III ACERT engine coupled directly to the crusher through a Transfluid® fluid coupling eliminates costly mechanical clutch problems or expensive hydraulic issues

USA Sourced GRADE 80 steel construction for strength and durability

Crossbelt magnet with stainless steel cladding and chutes to prevent magnetic material buildup

Caterpillar® 320 undercarriage with enhanced 322 travel motors utilized in a track-mounted design with easy to use wireless remote control allowing for quick and efficient setup and operation

Multiple catwalks and lockable access doors create ease of maintenance

Industry unique and patented Remote Controlled Crusher Relief System clears blockages and maximizes productivity

Specifications Subject To Change Without Notice
40" (1.02m) x 43" (1.09m) horizontal impact crusher
Years of proven engineering and design reliability
Large 43" wide (1.09m) x 32" (.81m) high feed inlet opening
Variable speed control from 600-700 rpm
Two fully adjustable aprons
For multi-stage crushing
Remote Crusher Relief System (U.S. Patent # 7,229,041)
Low chrome ceramic reversible blow bars (standard)
Optional high chrome ceramic or low chrome steel blow bars
4 bar rotor design
2 active low chrome ceramic bars & 2 inactive low chrome steel “dummy bars”

As the lid lifts up, the increase in opening height will dislodge most bridged materials that otherwise would completely shut-down production for a significant period of time.

Multiple safety features including sensors, mechanical stops and material guards guarantee safe operation.

Visit www.screenmachine.com to view working jobsite videos of the 4043T Impact Crusher
ENGINE

- Power supplied by a Caterpillar® C9 300 HP Tier III ACERT diesel engine
- Electronic control of engine speed ranges from 1800 to 2200 rpm
- 6 cylinder water-cooled with 4 Murphy® shut-downs
- Large, lockable engine compartment with easy walk-in maintenance access
  Provides ease of maintenance on all service access points
- 175 gallon (663 liter) fuel tank and 105 gallon (398 liter) hydraulic tank
  Hydraulic cooler maintains a cool running hydraulic system

FLUID COUPLING

- Transfluid® fluid coupling
  Provides smooth startup and shutdown operations of crusher without the risk of excessive wear or catastrophic failure
  Designed to permit instantaneous crusher stoppage due to steel or other large uncrushable material
  Slips fluid on fluid, causing no wear, unlike mechanical clutches
  Operator can uniquely disengage the crusher, move the machine and re-engage the crusher as quickly as you can read this

UNDERCARRIAGE

- The 4043T impact crusher utilizes a Caterpillar® 320 undercarriage
  Ensuring long term reliability, world-wide parts availability and product support
- Upgraded 322 drive travel motors provide optimum grade climbing and turning ability
  Idle engine speed allows the 4043T to be maneuvered slowly, for precision driving, while full engine speeds allow for tracking in all environments at low and high speeds
- Track operation is controlled from a safe distance
  Wireless remote control handset used for movement and operation

The Value of a Caterpillar® Undercarriage

Simply stated...many manufacturers of moving undercarriage components, including link assemblies, rollers, idlers & sprockets, (which represents up to 75% of the cost of the completed lower arrangement) do not have the stringent processes in place that yield quality components. Varying hardness levels, material specifications & manufacturing processes will often produce an inferior component leading to unpredictable wear rates, service points & ultimately destruction. The result is increased and unscheduled downtime causing increased operating costs and lower profits. Caterpillar® moving undercarriage components all go through special heat treating processes which provide consistent surface hardness, superior hardened depth & core hardness levels. The resultant components, be it a link, roller, sprocket or idler, have a distinct metallurgical advantage which yields superior wear resistance, strength & durability for long term service life. Screen Machine Industries, Inc. is committed to utilizing name brands that deliver maximum performance at the lowest operating costs per hour.

STRUCTURE

- Massive unibody structure features unrivaled deep frame design
  Unibody frame handles the high stresses of uneven loading during operation and rough terrain during movement
- USA sourced Grade 80 steel construction
  High strength wear resistant steel ensures long life structural integrity to address the most demanding jobsite applications
- Elevated frame design equates to rapid deployment and set up
  11” ground clearance uniquely eliminates the need for any machine disassembly or site preparation prior to movement

Specifications Subject To Change Without Notice

- 40”x13’-0” (1m x 4m) vibratory grizzly feeder
- 14’-0” (4.3m) long feed hopper opening
- Fixed hopper allows for quick setup and teardown
- No folding hopper walls to manipulate
- Grade 80 steel hopper wall construction
- AR400 replaceable liner plates on feeder deck
- T1 tapered grizzly bars for pre-screening
- Variable speed feeder range from 600 to 900 rpm
- Sheave drive allows hydraulic motor to work in optimal speed range, resulting in long life of motor
- Hydraulic motor is protected from falling debris and loaders
- Power supplied by a Caterpillar® C9 300 HP Tier III ACERT diesel engine
- Electronic control of engine speed ranges from 1800 to 2200 rpm
- 6 cylinder water-cooled with 4 Murphy® shut-downs
- Large, lockable engine compartment with easy walk-in maintenance access
  Provides ease of maintenance on all service access points
- 175 gallon (663 liter) fuel tank and 105 gallon (398 liter) hydraulic tank
  Hydraulic cooler maintains a cool running hydraulic system

- Cross-belt permanent magnet
- Four corner rachet adjustment for raise and lower
- Reversible direction
- Heavy duty belt with armor plating and flights for extended belt life
- Stainless steel chutes on both sides of the conveyor
- Prevents magnetic material build-up
- Impact bed under magnet for optimal controlled performance
- Variable speed magnet belt
- Remtron® wireless remote control with 300 ft. (91m) range
- Variable speed feeder with feeder shutoff
- Crusher relief system
- Full track motion and speed (high and low)
- Movement left, right, forward and backward
- Engine shutoff control button
  Wireless remote means never leaving the safety of the loader cab to reposition the 4043T and resume material processing
- Detailed control panel allows for ease of operation
- Four emergency stops mounted on machine for safety
- Optional Tethered Pendant Movement

Specifications Subject To Change Without Notice
Screen Machine Industries’ Spyder 516T is a perfect match to the 4043T Impact Crusher. This wireless remote controlled 3-way split screening plant satisfies the need for a heavy-duty machine to process large volumes in the most demanding applications. This unit can operate alone, or in tandem with the 4043T Impact Crusher (as shown below).

Features include:
- Patented overall machine design allows loaders to uniquely feed from 3 sides of the feeder while maintaining a safe distance from conveyors and stockpiles
- Massive structural components manufactured from Grade 80 USA Steel for superior durability
- Leading American brand name components to ensure peace of mind investment
- Impacts beds and apron feeders support severe duty applications
- Straight pass through design engineered to process large oversize materials
- 5’x16’ (1.5m x 4.9m) double deck shaker screen uses patented Smoothstart® technology

CONVEYORS

- Main belt:
  42” (1.07m) wide 440 PIW Global® belt
  10’-9” (3.28m) main belt discharge height, reversible in direction
  Precision® head & tail pulleys with spherical roller bearings
  Martin Engineering® belt scraper for optimum cleaning
  Large Dodge® reducer with hydraulic drive motor
  Impact bed below crusher discharge prevents belt wear
  Rubber disc return rollers and guide idlers on all belts

- Side stacker:
  Fines side conveyor with 24” (600mm) 220 PIW belt
  7’-0” (2.11m) discharge height
  Crusher bypass lever allows for optional fines removal
  Optional dust suppression system

SERVICEABILITY

- Split crusher housing for complete maintenance access
- Multiple non-slip platforms with ladders
- Key lock doors to service locations and tool storage compartment
- Service manuals in book form or electronic format
- Rapid response parts availability
- Free lifetime telephone and email technical support

Specifications Subject to Change Without Notice
Screen Machine Industries, Inc. is an innovative American manufacturer of portable machinery dedicated to material crushing, screening, washing and stockpiling. Our product offering provides production solutions across a vast array of applications ranging from 15 – 600 tons/yards per hour (rock, sand & gravel, concrete & asphalt, topsoil & compost products, just to name a few). Our engineering design philosophy of incorporating only industry leading brand name components and feature rich competitive advantages has prominently influenced our 40+ years of success.

The manufacturing process includes the utilization of high definition plasma tables, CNC fabrication equipment, robotic welders, advanced painting facilities and highly skilled mechanical technicians assembling these machines. Multiple levels of quality control and thorough run-time inspections are in place to ensure the quality and reliability that we demand and that you expect.

Screen Machine Industries, Inc. continues to make substantial investments in research and development. Our highly skilled engineers, combined with the latest computer technology, create the most innovative products in the screening industry. Numerous US Patents have been awarded as a result of our creative ambition in developing machinery superior to any in the world. We also strive to add the best design engineers to our organization. Several of our engineers are graduates of M.I.T. and other prestigious universities throughout the United States. Our machines are designed to handle the most rugged demands our customers require.

Our diverse product line consists of heavy-duty track-mounted Jaw and Impact Crushers, Spyders, Scalper, Trommel and Conventional Screening and Shredding Plants. Portable Radial Stacking Conveyors complete the product line with sizes available to fit most every job.
